

# MD MUNNA

## FULLSTACK-DEVELOPER

munnamia0200@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | +8801867418698 | Dhaka,Bangladesh

### CAREER OBJECTIVE

**Full-Stack Developer** with a strong foundation in building modern, scalable, and efficient web applications. Experienced in designing responsive, interactive user interfaces and developing robust back-end systems that deliver seamless functionality. Dedicated to writing clean, maintainable, and high-performance code using modern frameworks, tools, and best practices. Passionate about transforming complex ideas into intuitive digital experiences, optimizing performance, and continuously improving the development process. Recognized for adaptability, strong problem-solving skills, and a commitment to staying ahead of emerging technologies to create impactful, innovative solutions.

### SKILLS & EXPERTISE

- **Frontend :** HTML5, CSS3, Tailwind CSS, JavaScript, TypeScript, React.js, Next.js, Redux, Framer Motion, AOS, NextAuth, Firebase, Material UI, Daisy UI, Mamba UI, ShadCn/UI, Origin UI
- **Backend :** Node.js, Express.js, MongoDB, Mongoose, SQL, PostgreSQL, Prisma, JWT, Nodemailer, Redis, Passport.js, SSLCommerz, Stripe
- **Version Control and Deployment:** Github, Vscode, Postman, Vite, Figma, AI Driven Development Tools, Vercel, Netlify
- **API & Data Management :** Experienced with REST APIs, Axios, RTK Query, and React Query.
- **AI & Automation :** Hands-on with AI integrations via OpenRouter and other AI-driven tools.

### PROJECTS

#### RIDEFLOW

[Live site](#) | Github: [Client](#) | [Server](#)

**Category:** Ride Booking Platform

- Production-grade ride booking system (similar to Uber/Pathao) with role-based dashboards for **Riders, Drivers, and Admins**.
- Real-time ride management, earnings analytics, and dynamic dashboards.
- Features include Google OAuth, JWT authentication, and SOS emergency support.
- Fully responsive UI with dark/light mode, charts, and global state management.

**Technologies Used:** React.js, Redux Toolkit, RTK Query, TypeScript, Tailwind CSS, Shadcn/UI, Recharts, Node.js, Express.js, MongoDB, Mongoose, JWT

#### EDUGENIUS

[Live Site](#) | Github: [Client](#) | [Server](#)

**Category:** AI-Powered Education Platform(team project)

- Modern, scalable, AI-driven platform for personalized online learning.
- Role-based dashboards for Students, Instructors, and Administrators.
- Features include course creation, progress tracking, automated AI feedback, and certification.
- Integrates **Clerk Authentication, AI-powered recommendations, and analytics dashboards**.

**Technologies Used:** Next.js, React.js, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS, Clerk, TensorFlow.js

### CERTIFICATES

- Complete Web Development Course at Programming Hero (June 2024 – January 2025)
- Complete Next Level Web Development Course at Programming Hero (April 2025 – November 2025)
